

**Let us help you make your buying decision a little easier,
with our unconditional 30-day satisfaction guarantee.**

I've already told you at length that we offer the longest warranty in the industry. But that really only does you good if you are happy with your purchase.

That's why we also offer you a 30-day, no-questions asked satisfaction guarantee on every product we sell. That means you have the opportunity to try any of our products for up to 30 days.

Test them out in the field, on the ground, in a violent thunderstorm, whatever. See for yourself, how they perform.

See how bright the LEDs are. See what it's like to come across our flares or our beacons from down the road, or around a corner. Compare them head-to-head with whatever you are currently using. If you're not satisfied, simply pack them up and send them back to us for a full refund. Easy as that.

**Better still, for your first order,
I'll let you take up to 90 days to decide.**

I'm so certain you're going to love our signaling products, that when you place your first catalog order in the next 30 days, I'll triple the satisfaction guarantee and give you up to 90 days to decide. Again, no questions asked.

So I encourage you to take a few minutes to look over the enclosed catalog. Then if you have any questions or to place an order, give us a call at 1-855-778-6363. Or visit us online at www.SigCorps.com.

To Great Signals,

Steve Klindworth, CEO

P.S. [Name], what did you think of the road flare I sent along? We believe that these babies will replace phosphorous flares as the "go to" for any road emergency. They are longer lasting in a single use than a standard road flare (with a regular set of AA batteries they should run for up to 60 hours). They eliminate fire danger and they provide an active moving signal to attract attention. At just \$19.99 they pay for themselves after just a few uses. I would love your feedback on them. Give me a call personally at 1-855-778-6363 or drop me an email at Steve@SigCorps.com.

“We're very happy with the covert beacons. The lighting power exceeds our job site requirements and we'll be purchasing more for additional vehicles.”

— Leo Perez,
Operations,

Dear [Name],

There used to be a saying in the business world: "Nobody ever got fired for buying IBM."

Purchasing managers knew that by buying IBM they would be getting the best, most reliable products in the industry, even if the prices were overly inflated.

For years, that has been the thought in LED signaling products. There have been a few early providers who have dominated the market and purchasing managers have come to believe that these products are a "safe" bet. Nobody is going to fire you for buying from the old guard.

But what if you could get same or even better quality LED products for a fraction of the cost?

**Introducing SigCorps: high-quality, reliable
LED signals at the lowest prices in the industry.**

My name is Steve Klindworth. For years I owned and operated a company called SuperCircuits. At SuperCircuits we changed the way people looked at video security equipment, by developing and selling high-quality equipment at well below industry standards. In the process we gained a reputation for providing law enforcement agencies with some of the best equipment available on the market.

**Today at SigCorps we are doing the same
for LED Warning Signals.**

Why? Because I took a look at what was available on the market and determined we could offer the same, or even better quality products than what was available from any of the big three.

Look, it's no secret that just about every LED lighting product is being manufactured in Asia. *Even the products coming from the big three.* The reason for

(please continue...)

“Visibility is key and the SigCorps lights are phenomenal at that job. When I'm running code, there is no missing me!”

— Keith Young, Fireman,
Angola Fire Company, Angola, NY

**Why continue to pay 3 or 4 times
as much for LED signaling...
when you can get the same quality
or better for a fraction of the cost?**

Why send you an LED road flare?

"I sent you this free road flare for a couple of reasons. First because they're going to completely revolutionize the way people look at road flares. And, second because I believe the best way to show you the kind of quality to expect from SigCorps was to send you something you could see in action.

"I wanted you to see first hand just how bright the LEDs in our products are, and how attention getting they can be. Not to mention, durability...and it's just a road flare. If we've insisted on this kind of quality in a \$19.99 road flare, imagine what you can expect from our full line of signaling products.

"The AA batteries in your flare should keep it flashing for up to 60 hours...once you try it out, I'd love to know what you think. Drop me an email at Steve@SigCorps.com."

that is simple, that's where the best, more reliable LEDs are being made.

So why continue to pay \$1,200 or even \$2,500 for a lightbar when you can get the same reliable quality for less than \$600?

We did our homework before creating a single item in our extensive ProMark™ line. From our \$19.99 road flares to our top of the line \$599 ProMark LED Light Bar, every piece features the latest generation of LED from manufactures like CREE, Phillips and Epistar. These are the best LEDs on the market today.

Every unit is built with the toughest, field-tested housing available anywhere. For example, for the highest strength to weight ratio, our light bars feature aircraft grade extruded anodized aluminum, and our optical lenses are designed with the latest resins for maximum impact resistance and they are curved for efficient aerodynamics.

Our units are designed to face the most extreme weather and road conditions out there and keep on performing, year in and year out.

All the features you want and need, but without the upcharge.

Another thing we did when designing the ProMark™ series was study the features that are not only most essential, but also most popular. For example, many of our units feature a 100,000 hour lifetime rating and intuitive controllers. Then we built those features into many of our products instead of offering them as upgrades — so you get everything you want and need at one low price. (Plus you'll find our pricing right up front in our easy-to-read catalogs and on our website. So there is never any guessing involved.)

I'm so confident in these products that I've doubled the industry standard warranty on ALL our LEDs.

Check any of our competitors. You'll find their LEDs are warrantied for five years or less. At SigCorps you'll find that *every single one* of our LEDs is warrantied for a full 10 years.

You read that correctly, 10 years.

Why? Because we want you to understand that nobody is every going to get fired for buying SigCorps. *Instead you are likely to get recognized for finding a provider who offers you top-quality equipment and saves the company a boatload of money.*

I've been talking about our low prices for a while now. Let me show you exactly what I am talking about.

Here is a side-by-side comparison of two of our best selling products and what our biggest competitor sells comparable units for:

LED Beacon	SigCorp's BLXDSU5	Whelen's L10	LED Lighthead	SigCorp's PR7-3	Whelen's TIR3
					
LEDs	✓ 24	4	LEDs	✓ 3	✓ 4

Dual Axis	✓ Yes	No	Split Colors	✓ Yes	✓ Yes
Warranty	✓ 10 Years	5 Years	Sync	✓ Yes	✓ Yes
Price	✓ \$59.95	\$156.00	Warranty	✓ 10 Years	5 Years
			Price	✓ \$34.99	\$94.00

“ SigCorps products are well engineered for our industrial needs, service is excellent and pricing helps us to stretch scarce budget dollars a lot further. ”

— David Coleman,
Fleet Director,
City of Coleman,
Coleman, SC

High Quality at Low Prices is just one of things you'll find sets SigCorps apart...

No minimum orders for catalog items.

No annual commitments.

No hassle special requests...

Better still, we are easy to work with. We have heard horror stories from up-fitters, truck body builders and fleet managers alike.

We've been told about problems of being too small of a customer to get attention. Or that it's too much of a problem at some of the big boys to even consider a request for a custom item.

At SigCorps there is never a minimum order requirement or annual commitment on items in our catalog. If you need just one, we are happy to sell you just one. *This time and every time.* Plus our one item price is well below what you might expect from a bulk order at our competitors (and for most products we offer quantity discounts too).

Looking for a special order or custom item? Just ask.

We recently had a customer come to us because they were looking for blue beacons. It seems nobody had blue beacons and even with a sizable order it was just too much of a hassle for our competition to make them. At SigCorps we were willing to make blue beacons, so we got the order.

But it's more than that. If you want a special color sequence or color selection in the LEDs in your light bars, just ask. We are ready to work with you to make it happen, without a lot of hassle or bureaucracy... and do it in a timely manner.

Let us help you make your first order and every order an easy process.

As I said earlier, nobody is ever going to get fired for buying from SigCorps. But we also believe that nobody should get an ulcer over it either. That's why I've made a point of putting together one of the most knowledgeable and responsive customer service teams you are likely to encounter anywhere.

If you have questions about any of our products or how our specs compare to other products on the market, or even installation, just ask. That goes for special needs questions too. Don't be shy about asking, because we are here to help and meet your LED signal needs.

(please continue...)

“ SigCorps offers world-class customer service and technical support, while providing light bars, siren/PA and other equipment that sets us ahead of our competition. We will be calling on them to equip future patrol vehicles. ”

— J. Black, Chief,
Pasadena Security Agency, Pasadena, TX
