An important message from Jay Taylor

Since the bear market hit stocks in 2000, you have seen my Model Portfolio double in value, while the S&P 500 lost 20% of its value. For investors content to build wealth in a slow and steady manner with minimum risk, that isn't a bad track record. But...

If you want more aggressive investments that could make you quicker profits of 50%, 100% or more, in weeks or months—not years, read this...

Plus get up to 5 exclusive Bonus Reports FREE for acting now!

Dear *J Taylor's Gold & Technology Stocks* Subscriber,

While you know my reputation for designing a safe buy-and-hold investment strategy, many of my subscribers have been asking for more aggressive investment recommendations to spice up their portfolios.

And now might be just the right time
for more aggressive investing

As I have been warning for a number of years, we are moving quickly from the Kondratieff Autumn to a full-on and very cold K-Winter. But right now, before the crash, there are still a great many opportunities out there to make an amazing amount of money.

And that is why I want to give you this opportunity to make 50%–100% or more profits in weeks or months, not years...

Use Roger Wiegand's investing advice and
you could see your wealth double in just months

As a subscriber to *J Taylor's Gold & Technology Stocks*, you've seen the investing insight and wisdom of a close friend and colleague of mine, Roger "Trader Rog" Wiegand. I began running his *Rog's Corner* column because I wanted you to see great short-term stock trades that could bring extraordinary results if you are willing to take on a little more risk. Here are just a few examples of the phenomenal results of Trader Rog's recent picks...

- Silver Standard Resources (SSRI) shot up 27.37% in just 8 weeks!
- EnCana Corporation (ECA) grew 25.88% in only 12 weeks!
- White Knight Resources (WKR) jumped 25% in just 8 weeks!

Now, I'm pleased to invite you to become a Charter Subscriber to *Trader Tracks*, Roger Wiegand's new investment newsletter

You won't find Trader Rog's recommendations in *Gold & Technology Stocks* anymore. But now in this new publication, Roger will provide you with everything you need to make consistent profits from winning trades. You'll find that *Trader Tracks* concentrates on stocks ready to make exciting

“Roger is a gifted market technician with sound fundamental views.”

moves. Roger's picks are ideal for investors who are willing to risk a bit more for substantially higher and faster returns.

So if you have set aside a portion of your portfolios specifically for this purpose and understand more risk means more potential for a loss, this could be the newsletter for you.

(Of course, Roger provides you with the safety net of tight stop-loss recommendations—often no more than 1% or 2%—so if a stock goes down, you'll get out with a minimal loss.)

Plus, for those looking for more excitement, Roger provides a few very aggressive futures and options trades in each issue. So you'll have a choice, based on your risk tolerance.

In **Trader Tracks**, you'll find recommendations on what Roger likes to think of as little stocks—such as junior silver and gold stocks that are trading in the \$2, \$3 and \$4 range. These are the kind of stocks in which a movement of a point or two results in quick gains of 50%, 100% or more.

And then when it is time to get out—in a few weeks or months, Roger will get you out—usually with a nice gain, but before greed has a chance to take it all back.

You won't be overwhelmed with choices—just the best opportunities to make real profits

Roger only recommends a limited number of trades at a time. Too many investment newsletters inundate you with picks, but fail to give you the information you need to see why the trade is the right one now. Not Roger. He is one of the finest technical traders I know. And he knows his stuff. He literally eats, drinks and sleeps his trades. Here's what I mean:

He begins his day at 6:00 a.m. reviewing a host of websites and publications to keep current on the world and trends—there are more than 60 he keeps track of. And that doesn't count the myriad of sources he hunts down when he's researching a new trade. Then he spends the bulk of the day following trades and looking for new opportunities.

“I really like it that Roger is explicit in his directions on what to buy and when to sell.”

—Scott Linner
Homer, Ark.

Finally, when most of us are home enjoying a nice dinner with our families, Roger is still at work because he knows that some of the most key charts and reports first become available in the evening—and that's when he plans his moves for the following market day—to make sure you have the information you need to follow his trade recommendations to success.

The truth is, Roger loves this stuff and he loves helping people make money.
